This classic catamaran of English-made is 60% finished. Most materials for the completion of the renovation are present. Due to the favourable hull shape and the high stability is this Cherokee 35 great for large water. The reliable hydraulic operation of the two propeller shafts makes manoeuvre in small ports easy. For the interior the former owner used materials of high quality. A well-known water sports columnist (Charles E. Kanter) wrote about an old Cherokee "I feel this vessel is one of the better cruising boats ever build. It has sufficient hull volume to carry an enormous load without destroying its performance. It sails better than you would expect a boat of this size to sail. " "The Cherokee is build like a tank and is immensely strong. For those looking for a sturdy cruising boat in this size range, take a look and see if the Cherokee 35 fits your needs.
